Reviwer, Date	
Pull request	
Hotswaps detailing	
Pre-conditions	

Test Case Description	Test Steps	Jira/Story	Type	Priority	Expected Result	Actual Result	Assignee	ETA	Dev Env	Nightly Env	Staging Env	Prod Env	Comments
Luci: Store the bill id for issueCoupon and issueCouponWithCoun	Create a coupon series(Offer) and issue the offer to a user and pass the bill id in request body. Request body structure: { "seriesId": 1165160, "billId":1021, "customer": { "id": {{userId}} } }	Need to create	IT	P0	When luci get a call for issueCoupon and issueCouponWithCount it should store the bill id in DB (coupons_issued table)								
Intouch: User can filter the coupons with bill id in /v2/customers/coupons API (getCustomerCoupon API)	Create a coupon series(Offer) and issue the offer to a user and pass the bill id in request body. Request body structure: { "seriesId": 1165160, "billId":1021, "customer": { "id": {{userId}} } } Call the /v2/customers/coupons API with bill id lists in query param: /v2/customers/coupons/id={{userId}}&transactionIds=1021,1022	Need to create	IT	P0	Intouch should accept the filter request in param and map it to filter object and call luci.								
Luci: User can filter the coupons with bill id in /v2/customers/coupons API (getCustomerCoupon)	Create a coupon series(Offer) and issue the offer to a user and pass the bill id in request body. Request body structure: { "seriesId": 1165160, "billId":1021, "customer": { "id": {{userId}} } } Call the /v2/customers/coupons API with bill id lists in query param: /v2/customers/coupons/id={{userId}}&transactionIds=1021,1022	Need to create	IT	P0	Once luci receive the request from intouch it should filter the coupons with transactionIds.
